2. NOTIFICATION

The CSSF has provided the Commissione Nazionale per le Società e la Borsa (CONSOB) with a certificate of approval attesting that the Prospectus has been drawn up in accordance with the Prospectus Directive.

3. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE

Banca IMI S.p.A., the issuer of the Securities, is part of the Intesa Sanpaolo group, to which the Manager belongs as parent company, therefore participation relationships of the Manager with the Issuer, result in a conflict of interest.

The Issuer is expected to enter into hedging arrangements with market counterparties in connection with the issue of the Securities in order to hedge its exposure. Where the Securities placed by the Manager should be lower and/or higher the notional amount of the hedging arrangements entered into by the Issuer, the Issuer will unwind such arrangements for the notional amount in excess of the Securities placed or respectively will enter into additional hedging arrangements in respect of the shortfall. Costs and expenses resulting from the unwinding of any such hedging arrangements or from the Issuer entering into any additional hedging arrangements will be borne by the Issuer.

The Issuer will act as Calculation Agent under the Securities. See the risk factor "*Potential Conflicts of Interest*" of the Base Prospectus.

Save as discussed above and save for any commission payable to the Manager and costs payable to the Issuer referred to in item 97 of Part A above, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the Offer.

4. REASONS FOR THE OFFER, ESTIMATED NET PROCEEDS AND TOTAL EXPENSES

- (i) Reasons for the offer: See "Use of Proceeds" wording in Base Prospectus.
- (ii) Estimated net proceeds: The net proceeds (resulting from subtracting the commissions and the costs referred to in item 97 of Part A, from the aggregate Issue Price paid by the Securityholders) of the issue of the Securities will be up to EUR 145,776,000.

(iii) Estimated total expenses: Not applicable.

Section D – RISKS		
D.2	Key risks specific to the Issuer	<p>There are certain factors that may affect each Issuer's ability to fulfil its obligations under the Certificates issued under the Programme. These include the following risk factors:</p> <ul style="list-style-type: none"> i) Banca IMI is exposed towards governments, with particular reference to the Republic of Italy, and other public bodies in Europe and outside the Eurozone. The worsening of sovereign debt and its volatility, with particular reference to the differential in yield between Italian government bonds and other benchmark government bonds (the so-called spread), may have adverse effects on Banca IMI's business, financial condition or operating results. Furthermore, reductions in the rating of Italy, or forecasts that such reductions may occur, may cause the markets to become unstable and have a negative impact on the Issuer's operating results, financial conditions and prospects; ii) In accordance with the Intesa Sanpaolo Group's 2018-2021 Business Plan, Banca IMI will be merged into the parent company Intesa Sanpaolo S.p.A.. Merger transactions could cause uncertainties to business operations, particularly when unrelated companies are involved. Considering that Intesa Sanpaolo S.p.A. is the parent company of Banca IMI and that the merger takes place between two entities belonging to the same banking group, such merger is not expected to have any material adverse effects on the business of Banca IMI or the parent company; iii) Banca IMI's business may be adversely affected by international and Italian economic conditions, by financial markets trends, and by the developments and conditions in the markets in which Banca IMI operates; iv) Banca IMI's business is exposed to counterparty credit risk. Banca IMI routinely executes transactions with counterparties in the financial services industry. Many of these transactions expose Banca IMI to the risk that Banca IMI's counterparty in a foreign exchange, interest rate, commodity, equity or credit derivative contract defaults on its obligations prior to maturity when Banca IMI has an outstanding claim against that counterparty; v) Banca IMI's business is exposed to market risk, as the value of the financial and other assets held by Banca IMI in its trading portfolio may decrease as a result of changes in market variables; vi) Banca IMI's business is exposed to operational risks (i.e. the risks of incurring losses as a result of the inappropriateness or the malfunctioning of procedures, mistakes or shortcomings of human resources and internal systems, or external events); vii) Banca IMI's business is exposed to liquidity risk (i.e. the risk that Banca IMI will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost); viii) Banca IMI is party to a number of legal proceedings including civil, tax and administrative proceedings

		<p>that may lead to significant liabilities;</p> <p>ix) Banca IMI is exposed to risks arising from assumptions and methodologies for assessing financial assets and liabilities measured at fair value and linked to the entry into force of new accounting principles and to amendments to the applicable accounting principles. The estimates and assumptions used may vary from time to time and, as a result, in subsequent financial years the current values may differ, even significantly, due to changes in subjective assessments made or be otherwise reviewed to take account of changes occurred in that period;</p> <p>x) Banca IMI operates within a highly regulated industry and it is subject to the supervision activity carried out by the relevant institutions (in particular, the European Central Bank, the Bank of Italy and CONSOB). Both the applicable regulation and the supervision activity are subject to ongoing updates and developments in the practice;</p> <p>xi) In the normal course of its business, Banca IMI is exposed to different types of risk (liquidity risk, credit risk, operational risk, risks linked to compliance, business risk, as well as reputational risk). In the event that Banca IMI's internal policies and procedures for managing these risks are not effective, Banca IMI will incur loss, which may also be significant, with adverse effects on Banca IMI's business or financial condition;</p> <p>xii) Banca IMI's business is exposed to risk related to transactions in financial derivatives. Derivatives transactions expose the Issuer to the risk that the counterparty in derivative contracts defaults on its obligations or becomes insolvent before the relevant contract expires, when amounts are still payable to the Issuer by such party.</p>
D.6	Key risks specific to the securities	<p>An investment in relatively complex securities such as the Certificates involves a greater degree of risk than investing in less complex securities. In some cases, investors may stand to lose the value of their entire investment or part of it. In addition, there are certain factors which are material for the purpose of assessing the market risks associated with Securities issued under the Programme. In particular:</p> <p><u>(i) The Certificates may not be a suitable investment for all investors</u></p> <p>Certificates are complex financial instruments. A potential investor should not invest in Certificates which are complex financial instruments unless it has the expertise to evaluate how the Certificates will perform under changing conditions, the resulting effects on the value of the Certificates and the impact that this investment will have on the potential investor's overall investment portfolio.</p> <p><u>(ii) Option Risk</u></p> <p>The Securities are derivative financial instruments which may include an option right. Transactions in options involve a high level of risk.</p> <ul style="list-style-type: none"> • Risks related to the structure of the Securities <p><u>(i) General risks and risks relating to the underlying asset or basis of reference</u></p> <p>The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Purchasers should be prepared to sustain a partial or total loss of the purchase price of their Securities.</p> <p><u>(ii) Certain Factors Affecting the Value and Trading Price of Securities</u></p> <p>The Cash Settlement Amount at any time prior to the expiration is typically expected to be less than the trading price of the Securities at that time. The difference between the trading price and the Cash Settlement Amount will reflect, among other things, a "time value" for the Securities. The "time value" of the Securities will depend partly upon the length of the period left until they expire and the expectations concerning the value of the underlying asset. Securities offer hedging and investment diversification opportunities but also pose some additional risks with regard to interim value. The interim value of the Securities varies with the price of the underlying asset, as well as a number of other interrelated factors.</p> <p><u>(iii) Certain considerations regarding hedging</u></p> <p>Prospective purchasers intending to purchase Securities to hedge against the market risk associated with investing in the underlying asset, should recognise the complexities of utilising Securities in this manner.</p> <p><u>(iv) Certain considerations associated with Share Securities</u></p> <p>In the case of Securities relating to a share or to a GDR/ADR (or basket of shares or basket of GDRs/ADRs), no issuer of such shares will have participated in the preparation of the relevant Final Terms or in establishing the terms of the Securities and neither the Issuer nor any Manager will make any investigation or enquiry in connection with such offering with respect to any information concerning any such issuer of shares contained in such Final Terms or in the documents from which such information was extracted. Consequently, there can be no assurance that all events occurring prior to the relevant issue date that would affect the trading price of the shares will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning such an issuer of shares could affect the trading price of the shares and therefore the trading price of the Securities. Securityholders will not have voting rights or rights to receive</p>

		<p>dividends or distributions or any other rights with respect to the relevant shares to which such Securities relate.</p> <p><u>(v) Loss risk in relation to the investment</u></p> <p>The investor shall consider that, in relation to their investment, there is a risk of total or partial loss of the capital invested depending on the performance of the underlying asset.</p> <p><u>(vi) Price Risk and components that determine the value of the Certificates</u></p> <p>The Certificates are composed of a combination of several options and the Securityholder shall take into account that the value of the Certificates will depend on the value of each option composing the certificate. The fluctuation over the time of the value of each optional components mostly depends on the current value of the underlying asset to which the Certificates relate, the volatility of the underlying asset, the residual life of the options composing the Certificates, the levels of the interest rates of the monetary markets, the expected dividends, as well as the business of the Issuer of the underlying asset, speculative contractions and other factors.</p> <p><u>(vii) Risk related to the Barrier Event</u></p> <p>If a Barrier Event occurs, the Cash Settlement Amount will be determined in accordance with a calculation method other than the calculation method applicable if the Barrier Event does not occur and such circumstance may have a negative influence on the price. This may entail the risk of partial or total loss of the investment.</p> <p>• <i>Risks Related to Securities generally</i></p> <p><u>(i) Modification</u></p> <p>The Conditions provide that the Principal Security Agent and the Issuer may, without the consent of Securityholders, agree to (i) any modification (subject to certain specific exceptions) of the Securities or the Agency Agreement which is not prejudicial to the interests of the Securityholders or (ii) any modification of the Securities or the Agency Agreement which is of a formal, minor or technical nature or is made to correct a manifest error or proven error or to comply with mandatory provisions of law.</p> <p><u>(ii) Expenses and Taxation</u></p> <p>The Issuer shall not be liable for or otherwise obliged to pay any tax, duty, withholding or other payment which may arise as a result of the ownership, transfer, exercise or enforcement of any Security by any person and all payments made by the Issuer shall be made subject to any such tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted.</p> <p><u>(iii) U.S. Foreign Account Tax Compliance Withholding</u></p> <p>The Issuer and other financial institutions through which payments on the Securities are made may be required to withhold U.S. tax at a rate of 30 per cent. on all, or a portion of, "foreign passthru payments" (a term not yet defined) made two years after the date of publication of final U.S. Treasury Regulations defining the term "foreign passthru payment" or later. This withholding would potentially apply to payments in respect of (i) any Securities characterised as debt (or which are not otherwise characterised as equity and have a fixed term) for U.S. federal tax purposes that are issued after the "grandfathering date" which (A) with respect to Securities that give rise solely to foreign passthru payments, is the date that is six months after the date on which final U.S. Treasury Regulations defining the term foreign passthru payment are filed with the Federal Register, and (B) with respect to Securities that give rise to a dividend equivalent pursuant to Section 871(m) of the U.S. Code as discussed below (and therefore do not give rise to foreign passthru payments), is the date that is six months after the date on which obligations of their type are first treated as giving rise to dividend equivalents, or in either case are issued on or before the grandfathering date and are materially modified thereafter, and (ii) any Securities characterised as equity or which do not have a fixed term for U.S. federal tax purposes, whenever issued. If Securities are issued on or before the grandfathering date, and additional Securities of the same series are issued after that date, the additional Securities may not be treated as grandfathered, which may have negative consequences for the existing Securities, including a negative impact on market price.</p> <p>While the Securities are in global form and held within the clearing systems, it is not expected that FATCA will affect the amount of any payment received by the clearing systems. However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. FATCA also may affect payment to any ultimate investor that is a financial institution not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA withholding. Investors should choose their custodians and intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. The Issuer's obligations under the Securities are discharged once it has paid the common depositary or common safekeeper for the clearing systems (as bearer or registered holder of the Securities) and the Issuer has therefore no responsibility for any amount thereafter transmitted through the hands of the clearing systems and custodians or intermediaries. The documentation expressly contemplates the possibility that the Securities may go</p>
--	--	---

into definitive form and therefore that they may be taken out of the clearing systems. If this were to happen, then a non-FATCA compliant holder could be subject to FATCA withholding.

If an amount in respect of U.S. withholding tax were to be deducted or withheld from payments on the Securities, none of the Issuer, any paying agent or any other person would, pursuant to the conditions of the Securities, be required to pay additional amounts as a result of the deduction or withholding of such tax. As a result, investors may receive a lesser amount than expected. Holders of Securities should consult their own tax advisers for a more detailed explanation of FATCA and how FATCA may apply to payments they receive under the Securities.

FATCA is particularly complex and its application to the Issuer, the Securities, and investors in the Securities is uncertain at this time. The application of FATCA to "foreign passthrough payments" on the Securities or to Securities issued or materially modified after the grandfathering date may be addressed in the relevant Final Terms or a supplement to the Base Prospectus, as applicable.

On 10 January 2014, representatives of the Governments of Italy and the United States signed an intergovernmental agreement to implement FATCA in Italy (the "IGA"), which entered into force on 1st July 2014. The IGA ratification law entered into force on 8 July 2015. Under these rules, the Issuer, as a reporting financial institution, will be required to collect and report certain information in respect of its account holders and investors to the Italian tax authorities, which would automatically exchange such information periodically with the U.S. Internal Revenue Service.

(iv) U.S. Dividend Equivalent Payments

U.S. Treasury Regulations under Section 871(m) of the Code imposing a withholding tax on certain "dividend equivalents" under certain "equity linked instruments" exclude from their scope instruments issued before calendar year 2021 that do not have a "delta of one" with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an "Underlying Security"). Subject to this pre-2021 exemption, Section 871(m) of the Code will apply to a financial instrument (a "Specified Security") if it meets either (i) a "delta" test, if it is a "simple" contract, or (ii) a "substantial equivalence" test, if it is a "complex" contract. Section 871(m) of the Code provides certain exceptions to this withholding regime, in particular for instruments linked to certain broad-based indices that meet requirements set forth in the applicable Treasury regulations, as well as instruments that track such indices. If the terms of a financial instrument issued before calendar year 2021 (that is exempt from withholding under Section 871(m) of the Code) are "significantly modified" sometime after calendar year 2020 such that the financial instrument is treated as retired and reissued for U.S. federal income tax purposes, it will lose this exemption. Withholding in respect of dividend equivalents will generally be required when cash payments are made on a Specified Security or upon the date of maturity, lapse or other disposition by the non-U.S. holder of the Specified Security. If U.S. Underlying Equities are expected to pay dividends during the term of the Specified Security, withholding generally will still be required even if the Specified Security does not provide for payments explicitly linked to dividends. If the Issuer or any other relevant withholding agent determines that withholding is required, neither the Issuer nor any withholding agent will be required to pay any additional amounts with respect to amounts so withheld.

Section 871(m) of the Code is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. You should consult your tax advisor regarding the potential application of Section 871(m) of the Code to the Securities.

(v) Other taxation considerations

It is not possible to predict whether the taxation regime applicable to Securities on the date of purchase or subscription will be amended during the term of the Securities.

(vi) Illegality and Cancellation

If the Issuer determines that its performance under any Securities has, or that any arrangements made to hedge the Issuer's obligations under any Securities have, become (i) illegal, in whole or in part for any reason, or (ii) by reason of a force majeure event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable, the Issuer may cancel the Securities. If the Issuer cancels the Securities, it will pay the holder of each Security an amount equal to the fair market value of such Security.

(vii) Hedging Disruption

In connection with the offering of the Securities, the Issuer or its affiliates may enter into one or more hedging transaction(s) with respect to an Underlying or related derivatives, which may affect the market price, liquidity or value of the Securities.

In case of the occurrence of an Hedging Disruption the Calculation Agent may consider such event as an Early Redemption Event and the Issuer shall terminate its obligations under the Securities and shall pay or cause to be paid an amount on the basis of the fair market value of the Securities (the bid-value in case of Italian Traded Securities).

(viii) Change of law

		<p>No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of this Base Prospectus.</p> <p><u>(ix) Potential Conflicts of Interest</u></p> <p>Some activities of the Issuer or any of its Affiliates could present certain conflicts of interest, influence the prices of such shares or other securities and adversely affect the value of such Securities.</p> <p><u>(x) United Kingdom's exit from the European Union</u></p> <p>On 23 June 2016, the United Kingdom (the "UK") held a referendum on the UK's membership of the EU. The result of the referendum's vote was to leave the EU.</p> <p>There are a number of areas of uncertainty in connection with the future of the UK and its relationship with the European Union and the negotiation of the UK's exit terms and related matters may take several years. Given this uncertainty and the range of possible outcomes, it is not currently possible to determine the impact that the referendum, the UK's departure from the European Union and/or any related matters may have on general economic conditions in the UK and the European Union. It is also not possible to determine the impact that these matters will have on the Issuer or any other party to the transaction documents, or on the regulatory position of any such entity or of the transactions contemplated by the transaction documents under EU regulation or more generally.</p> <p>• Risks Related to the Market Generally</p> <p><u>(i) Impact of implicit fees on the Issue/Offer Price</u></p> <p>Investors should note that implicit fees may be a component of the Issue/Offer Price of Securities, but such fees will not be taken into account for the purposes of determining the price of the relevant Securities in the secondary market.</p> <p><u>(ii) Certain considerations associated with public offers of Securities</u></p> <p>If Securities are distributed by means of a public offer, the Issuer may have the right to withdraw the offer, which in such circumstances will be deemed to be null and void.</p> <p><u>(iii) Possible Illiquidity of the Securities in the Secondary Market</u></p> <p>If the Issuer does list or admit to trading an issue of Securities, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such exchange or market will not be suspended. In the event of a delisting or suspension of listing or trading on a stock exchange or market, the Issuer will use its reasonable efforts to list or admit to trading the Securities on another exchange or market. The Issuer or any of its Affiliates may, but is not obliged to, at any time purchase Securities at any price in the open market or by tender or private treaty. Any Securities so purchased may be held or resold or surrendered for cancellation. To the extent that an issue of Securities becomes illiquid, an investor may have to wait until the Exercise Date to realise value.</p> <p><u>(iv) Listing of Securities</u></p> <p>In respect of Securities which are to be listed on a stock exchange, market or quotation system, the Issuer shall use all reasonable endeavours to maintain such listing, provided that if it becomes impracticable or unduly burdensome or unduly onerous to maintain such listing, then the Issuer may apply to delist the relevant Securities, although in this case it will use all reasonable endeavours to obtain and maintain an alternative admission to listing, trading and/or quotation by a stock exchange, market or quotation system within or outside the European Union, as it may decide. If an alternative admission is not available or is, in the opinion of the Issuer, impracticable or unduly burdensome, an alternative admission will not be obtained.</p> <p>• Legal Risks</p> <p><u>(i) Legal investment considerations may restrict certain investments</u></p> <p>Potential investors should consult with their own tax, legal, accounting and/or financial advisers before considering investing in the Securities.</p> <p><u>(ii) No reliance</u></p> <p>None of the Issuer, the Manager, if any, or any of their respective affiliates has or assumes responsibility for the lawfulness of the acquisition of the Securities by a prospective purchaser of the Securities.</p> <p><u>(iii) Disclaimers</u></p> <p>Each type of structured Security will be issued subject to express disclaimers in respect of the risks involved in investing in such Securities.</p>
