### WHAT IS THIS PRODUCT?

TYPE	Digital Protected Investment Certificate
------	--

### OBJECTIVES

The objective of the product is to provide additional return in exchange for the risk of partial loss of capital.

#### Underlying

FTSE® MIB® IDX Index (ISIN: GB00BNNLHW18).

#### How the return is determined

- **Reference Value of the Underlying:** On each Valuation Period, the value of the Underlying will be equal to the arithmetic mean of the daily closing levels of the Underlying on each date of such Valuation Period.
- **Settlement Amount at Expiry Date:** The amount at the Expiry Date will be determined as follows:
  - If the Underlying Final Value is higher than or equal to the Barrier Level:**  
The investor will receive on the Settlement Date an amount equal to the Issue Price.
  - If the Underlying Final Value is lower than the Barrier Level:**  
The investor will receive on the Settlement Date an amount linked to the Underlying Final Value, which will not be lower than the Protection.
- **Digital Amount:** The product provides for the payment of one or more Digital Amounts if the Reference Value of the Underlying, on the relevant Digital Valuation Period, is higher than or equal to the Digital Level. The Digital Amount is equal to EUR 40.5 and will be paid on the relevant Digital Payment Date. Otherwise, if the Reference Value of the Underlying, on the relevant Digital Valuation Period, is lower than the Digital Level, no Digital Amount will be paid on the relevant Digital Payment Date.

- is willing to afford a partial loss of the invested amount at the maturity date;
- wants to have the possibility to disinvest the product before its maturity date, although without any guarantees to get back the invested amount.

**WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?**

**SUMMARY RISK INDICATOR**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay you. The Issuer has classified this product as 2 out of 7, which is a low risk class. This classification results from two elements: an estimation of the market risk that rates the potential losses from future performance at a low level, and an estimation of the credit risk, according to which poor market conditions are very unlikely to impact the capacity of the Issuer to pay you. You are entitled to receive back at least 90% of the Issue Price. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash-in before 31 March 2022. If the Issuer is not able to pay you what is owed, you could lose your entire investment.

**PERFORMANCE SCENARIOS**

**Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.**

INVESTMENT EUR 10,000		
SCENARIOS		Expiry Date (Recommended holding period)
Stress scenario	What you might get back after costs	EUR 8,601
	Percentage return	-13.99%
Unfavourable scenario	What you might get back after costs	EUR 9,944
	Percentage return	-0.56%
Moderate scenario	What you might get back after costs	EUR 9,944
	Percentage return	-0.56%
Favourable scenario	What you might get back after costs	EUR 9,944
	Percentage return	-0.56%

This table shows the money you could get back until the Expiry Date, under different scenarios, assuming that you invest EUR 10,000. The scenarios shown illustrate how your investment could perform. Due to the recommended holding period shorter than 1 year, you can compare the values contained in this section and in the section "What are the costs?" only with the values concerning other products with the same recommended holding period. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where the Issuer is not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**WHAT HAPPENS IF INTESA SANPAOLO S.P.A. IS UNABLE TO PAY OUT?**

This product is not protected by any investor compensation or guarantee scheme. The issuer's duties arising from the product are unsubordinated in respect of other liabilities of the issuer, with the exception of those liabilities which are preferred by any applicable law. As a consequence, in case of winding up of the issuer, the payment obligation of the issuer will rank pari passu with all other unsecured and unsubordinated payment obligations and the investor may lose part or the entire investment. In case of the issuer is considered as failing or likely to fail, this investment could be subject to the so-called "bail-in" which could implicate, pursuant to the law that envisages that any noteholder should not be charged for losses that are higher than those he should had been charged for if the bank would be wound up, the partial or total write-down of the product, the reduction to zero of the claims attached to such security or their conversion into shares. We advise you that any kind of payment could be delayed.

## WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account the one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the holding period. They include potential early exit penalties. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.
