WHAT IS THIS PRODUCT?

TYPE	Digital Protected Investment Certificate
TERM	The Maturity Date of the product is 29 September 2025.

OBJECTIVES

The objective of the product is to provide additional return in addition to the invested capital.

Underlying

EUROSTAT EUROZONE HICP EX TOBACCO UNREVISED SERIES NSA Index (Bloomberg Code: CPTFEMU<Index>)

How the return is determined

- **Reference Value of the Underlying:** the value of the Underlying will be registered on each Valuation Date and will be equal to the value of the Underlying related to the month of July preceding the relevant Valuation Date.
- **Settlement Amount at Expiry Date:** the investor will receive on the Settlement Date an amount equal to the Issue Price.
- **Digital Amount:** the product provides for the payment of one or more Digital Amounts if the Reference Value of the Underlying on the relevant Digital Valuation Date is higher than or equal to the relevant Digital Level that will change in relation to each Digital Valuation Date. In particular, the Calculation Agent will use, for the purposes of determining the relevant Digital Level, the Reference Value registered in the relevant Cliquet Valuation Date (Cliquet Feature).
The Digital Amount is equal to EUR 41.50 and will be paid on the relevant Digital Payment Date. Otherwise, if the Reference Value of the Underlying on the relevant Digital Valuation Date is lower than the relevant Digital Level, no Digital Amount will be paid on the relevant Digital Payment Date.

Adjustments

The terms of the product provide that upon occurrence of certain extraordinary events, the Issuer, in its capacity as calculation agent, will be entitled to (i) take certain adjustments, actions, determinations or amendments and/or (ii) early redeem the product, even acting in its sole discretion. Therefore, the amounts receivable under the certificates may be affected by what the Issuer will undertake as a consequence of the events specified in the terms and conditions of the product.

INTENDED RETAIL INVESTOR

This investment is intended for investor who:

- has a medium knowledge/experience of markets and financial products;
- has an investment horizon consistent with the maturity date of the product;
- intends to obtain an amount at least equal to the nominal amount of the investment at the maturity date;
- wants to have the possibility to disinvest the product before its maturity date, although without any guarantees to get back the invested amount.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay you. The Issuer has classified this product as 1 out of 7, which is the lowest risk class. This classification results from two elements: an estimation of the market risk that rates the potential losses from future performance at a very low level, and an estimation of the credit risk, according to which poor market conditions are very unlikely to impact the capacity of the Issuer to pay you. You are entitled to receive back at least 104.15% of the Issue Price. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash-in before 29 September 2025. If the Issuer is not able to pay you what is owed, you could lose your entire investment.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: Until the product matures

Example Investment: EUR 10,000

Scenarios	If you exit at expiry (recommended holding period)	
Minimum	EUR 10,000. The return is only guaranteed if you hold the product until maturity.	
Stress	What you might get back after costs	EUR 10,000
	Percentage return	-0.00%
Unfavourable	What you might get back after costs	EUR 10,000
	Percentage return	-0.00%
Moderate	What you might get back after costs	EUR 10,000
	Percentage return	-0.00%
Favourable	What you might get back after costs	EUR 10,000
	Percentage return	-0.00%

The scenarios are shown in five hypotheses of market conditions at the recommended holding period. The stress scenario shows what you might get back in extreme market circumstances. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF INTESA SANPAOLO S.P.A. IS UNABLE TO PAY OUT?

This product is not protected by any investor compensation or guarantee scheme. The issuer's duties arising from the product are unsubordinated in respect of other liabilities of the issuer, with the exception of those liabilities which are preferred by any applicable law. As a consequence, in case of winding up of the issuer, the payment obligation of the issuer will rank pari passu with all other unsecured and unsubordinated payment obligations and the investor may lose part or the entire investment. In case of the issuer is considered as failing or likely to fail, this investment could be subject to the so-called "bail-in" which could implicate, pursuant to the law that envisages that any noteholder should not be charged for losses that are higher than those he should had been charged for if the bank would be winded up, the partial or total write-down of the product, the reduction to zero of the claims attached to such security or their conversion into shares. We advise you that any kind of payment could be delayed.

WHAT ARE THE COSTS?

The Subject advising on or selling you this product may charge you other costs. If so, this Subject will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return).
- EUR 10,000 is invested.
